

Solution Story:

Norfolk Collegiate Fine Arts Center

Another quality solution by: VICOM, Virginia Integrated Communications

Date: July, 2013

Author: Robert Michalochick AE.

Highlights

- Large Auditorium with Theater Capabilities and Chorus Classroom Audio
- Apple Advanced Graphics Computer Lab. Dell & Apple Advanced Journalism Computer Lab
- Complete Data System connects to existing core over fiber.

A NEW FINE ARTS CENTER FOR NORFOLK COLLEGIATE

In May 2013, Vicom completed the design and implementation of the new "Fine Arts Center" for Norfolk Collegiate School in Norfolk VA. Vicom provided a complete turn-key solution for all of the schools technology needs that included the following core technologies: Data Network, Data Storage, Desktop Computers, Voice Network, Cabling Infrastructure, Wireless Access, Building Security, and Video/Audio-Visual.

Norfolk Collegiate - New Fine Arts Center

Vicom integrated all new equipment with the existing voice, video and data network infrastructure.

Vicom Equipped and integrated a large auditorium/theater with a 27'6" wide projection screen, Panasonic 10,600-lumen 3-chip DLP projector, and a state of the art audio and recording system using a Roland M-480V Digital Mixer.

JOURNALISM & GRAPHICS COMPUTER LAB SPACES

Vicom designed and installed computer labs for the Advanced Journalism Class and the Computer Graphics Class. Vicom utilized both Dell Precision Workstations and Apple iMAC's with 27 inch monitors. Vicom provided everything from the infrastructure cabling, furniture and desktop computers to complete this turn key solution. Vicom provided an EMC Storage solution as part of this project to expand the existing capabilities of the schools storage area network.

Graphics Lab

Advance Journalism Lab

Vicom provided the building security from design to implementation utilizing an Honeywell Security system integrated into the existing building security. Vicom provided a total telecommunications, network, security and video solution, including initial planning, consultation, design, integration and implementation. The flexible networking solution, provided by Vicom, allowed Norfolk Collegiate to integrate voice, data, security and video communications in a way to best meet their needs, with no compromise in quality and reliability.
